# Cyber OverVue

**Data driven solution that helps you evaluate the cyber risk of an organization**

Cyber OverVue is an advanced analytics solution that leverages proprietary cyber loss data to facilitate effective, data-driven decision-making on cyber risk. Create a holistic view of an organization's cyber risk, combining insights from its historical loss experience as well as forecasting potential scenarios and how they could impact the organization.

## Providing Actionable Intelligence with a Database of 100,000+ Cyber Cases

## Frequency & Severity

Help businesses understand their cyber risk, what areas are vulnerable to attack and what the impact could be on their organization. Identify how likely an organization is to experience a cyber event and how much the financial impact could be.

## Critical Insights & Data

High-level insights on how a company's historical loss experience compares to that of its peer group to help identify areas at risk. With analysis of more than 70 different variables across more than 100,000+ cyber events to simulate the potential impact of cyber incidents.

## Comprehensive Benchmarking

Guidance on the appropriate amount of insurance to purchase through limit adequacy analyses, as well as traditional benchmarking analyses that give insights on peer purchasing behavior.
