

SIMPLIFY YOUR WORKFLOW WITH INSTANT & ACCURATE DATA PREFILL

# TurboRater Prefill Integrations for Auto & Home

## TransUnion's Vehicle and Household Driver Prefill

Simplify your quoting process by adding driver and vehicle prefill data embedded into TurboRater via our integration with TransUnion. By entering limited client information, the insurance application will automatically populate the household and vehicle information.

To simplify your workflow, TransUnion Vehicle Prefill incorporates many of the required application fields like VIN, make, model, model year, state of registration, and more, within seconds.

In addition, TransUnion Household Driver Prefill provides the client's details such as gender, date of birth/age, and more including the discovery of additional household members. All this data flows right into TurboRater to save you time.

## CoreLogic's Residential Replacement Cost Estimator with Property Lookup Prefill

Get fast and reliable residential replacement cost valuations within TurboRater for your home and dwelling clients via our CoreLogic integrations with just a click of a button.

With just the property address, CoreLogic's Property Lookup feature saves you time when quoting home or dwelling by prepopulating much of the home's characteristic information right into TurboRater.

In addition, CoreLogic's Residential Replacement Cost Estimator report includes a detailed building description with a building material breakdown and construction valuations per category.
